 - c) Rejection of claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimkets et al WO 2001/42845A2 in view of Krieg et al WO/1998/018810 Date May 7, 1998 is withdrawn in light of applicant's amendment thereto.
 - d) Rejection of claim 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiyama et al 1996 Nucleic Acids Research Vol. 24 No. 7 pgs. 1272-1278 in view of Krieg et al WO/1998/018810 Date May 7, 1998 is withdrawn in light of applicant's amendment thereto.

These rejections may be reinstated upon the resolution of the new matter issue set forth below

New Grounds of Rejection

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1645

3. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Claim 1 has been amended to recite the limitation “6-O-methyl-2’-deoxyguanine”. There is no apparent support for this limitation in the specification as originally filed. Applicant points to page 6 of the specification as providing support for said limitation. However the cited portion of the specification refers to “6-O-methyl-2’-deoxyguaninsine” and does not provide support for the limitation “O6-Me-2’-deoxyGuanine” as deoxyguanine and deoxyguanosine are different molecules. Consequently, the limitation “6-O-methyl-2’-deoxyguanine” constitutes new matter. Applicants pointing to the specification by page and line number where specific written description for the said recitation “6-O-methyl-2’-deoxyguanine” can be found may resolve this issue.

Conclusion

4. No claims are allowed.

Claims 1-5 are rejected.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

Art Unit: 1645

advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
